

WELCOME TO GBS

GBS is a leading offshore software development company in India, focusing on providing ready to deploy business solutions for a number of industries. The projects are handled by a team having expertise and excellent exposure to international projects.

We offer you our invaluable experience in accomplishing "Hot Projects" within a very strict deadline and small budget. On time and on budget delivery is our core principle.

Our prices are much lower in comparison with EU, US and other East Asian analogues. Being based in India allows us to cut costs while preserving the highest quality of the final product. All prospective clients, building realistic project plans and insuring smooth progress throughout the development cycle are always our top priorities.

SERVICES

We can develop Web Based applications in the technology that suits the customer requirements.

We can start from the Business Domain study and can develop the software covering the full project life cycle from requirement analysis to testing and also implementation and after sales support.

We can provide 24 X 7 online support to our clients at any part of the world and also onsite support in case of any requirement from client side.
